

ENTERPRISE SERVICE EXCELLENCE | CASE STUDY

Enterprise IT FMS & Managed Support

GNFC Head Office, Bharuch & TDI-II, Dahej

PC • SOFTWARE • NETWORK • HELPDESK

SERVICE PROFILE

A resilient, on-site field managed services model supporting user computing, enterprise applications, LAN operations, fibre diagnostics, collaboration systems and service governance.

2023-2026

THREE CONSECUTIVE COMPLETED SERVICE CYCLES

D-TECH SOLUTION INTEGRATORS PVT. LTD.

Lead with Trust. Inspire with Vision.

MISSION-CRITICAL END-USER OPERATIONS

A field service model built for industrial continuity

GNFC entrusted D-TECH with integrated PC hardware, software and network support across its Head Office in Bharuch and TDI-II facility in Dahej. The engagement combines resident helpdesk operations, field response, preventive activity, asset control and specialist network diagnostics.

~1,720

PCs + laptops*

2

Primary locations

6 days

On-site coverage

3 years

Completed continuity

*Latest documented 2025-26 scope: approx. 1,630 PCs and 90 laptops; laptops covered for software services.

Engagement at a glance

RESIDENT HELPDESK

Continuous monitoring of online complaints, call logging and immediate action updates.

FIELD ENGINEERING

User-location support for hardware, operating systems, applications and connected devices.

NETWORK OPERATIONS

LAN troubleshooting, rack upkeep, switch and Wi-Fi support, cabling and fibre testing.

SERVICE GOVERNANCE

Asset verification, spares control, escalation, safety compliance and periodic reporting.

CASE-STUDY PROPOSITION

D-TECH converted a broad maintenance requirement into one coordinated operating layer - combining people, process, tools, spares and governance under a single accountable service model.

INDUSTRIAL IT COMPLEXITY

One support partner across users, devices and network operations

GNFC's operating environment required reliable assistance across a large and changing endpoint estate, two geographically separated sites and a mix of office, plant, application and network dependencies.

SCALE & DIVERSITY

A large estate of desktops, all-in-one systems and laptops with varying models, warranties and software profiles.

USER CONTINUITY

Fast restoration of productivity while protecting user data during troubleshooting, reinstallation and migration.

PLANT CONSTRAINTS

Controlled access, safety procedures and restricted vehicle movement inside the industrial environment.

NETWORK DEPENDENCY

LAN, racks, access points, media devices, cabling and fibre links requiring coordinated fault isolation.

OPERATIONAL VISIBILITY

Every complaint, replaced component, asset change and service action needed auditable documentation.

AFTER-HOURS READINESS

Breakdowns, shutdown activity, conferences and priority requirements could occur beyond normal hours.

The operational requirement

Create a service desk that can own the complete incident journey - from user call to diagnosis, repair, replacement, documentation and closure - while keeping GNFC officers informed.

INTEGRATED TECHNOLOGY COVERAGE

A complete FMS service catalogue

The service catalogue spans the day-to-day needs of users and the underlying connectivity fabric. D-TECH's team operates as a coordinated extension of GNFC's Information Systems Department.

END-USER COMPUTING

Comprehensive PC hardware and software maintenance, fault diagnosis, OEM-compatible spares and user support.

OS & APPLICATIONS

Windows installation and upgrades; Office, antivirus, AutoCAD, Adobe, SAP and GNFC application support.

DATA PROTECTION

Backup and restoration before reinstallation, migration from old to new PCs and controlled handling of user data.

LAN & WI-FI

Connectivity isolation, switches, access points, media devices, rack maintenance, patching and temporary connectivity.

CABLING & FIBRE

New LAN connections, UTP termination, optical power measurement, OFC troubleshooting and OTDR reporting.

COLLABORATION

Operational readiness for projectors, scanners and video-conferencing sessions at Bharuch and Dahej.

ASSET CONTROL

Survey, asset tagging, make/model/serial/location records, additions/deletions and device condition reporting.

PRINTER SERVICES

A separately certified printer AMC complements the broader FMS support environment.

FROM REQUEST TO VERIFIED CLOSURE

A disciplined, auditable incident lifecycle

The operating model combines an online complaint system with on-site technicians, specialist tools, controlled spares and management reporting. Each stage has a clear ownership point.

Delivery controls

DOCUMENTED OPERATING COMMITMENTS

Service levels backed by practical readiness

GNFC's contractual framework defines coverage, response expectations, reporting and resource readiness. D-TECH's delivery model connects these commitments to operational controls.

08:00-17:00

Normal service window

MON-SAT

Six-day on-site coverage

WITHIN 1 HR

Holiday / after-hours support

24 HOURS

OTDR arrangement for OFC fault

CONTROL AREA	DELIVERY COMMITMENT
Complaint management	Continuous monitoring of pending calls; telephone requests entered into the online system.
Corrective support	Unlimited corrective calls within scope, with immediate attention to sudden breakdowns.
Uptime control	Maximum uptime objective; complaints remaining beyond 24 hours tightly controlled by category.
Asset assurance	Initial survey, ongoing asset verification and updated location-wise device records.
Reporting	Monthly complaint analysis and quarterly service / spare-replacement reporting.
Resource assurance	Tools, spares and manpower mobilised before service commencement; alternate technician coverage.

FMS assurance principle

Availability is supported by more than reaction time: resident presence, accurate records, ready tools, controlled spares, disciplined escalation and transparent reporting work together to reduce operational risk.

DOCUMENTED SERVICE CONTINUITY

Completion certified across consecutive engagements

Four GNFC-issued completion certificates provided for this case study confirm execution of the referenced services and state that no services remained due under the respective orders.

2023-24 **PC HW-SW-NW support**

Contract 7700019072 • Completed 31 May 2024
Renewed for one more year

2024-25 **PC HW, SW & network AMC**

Contract 7700020089 • Completed 31 May 2025
No extension recorded

2025-26 **PC HW, SW & NW ARC**

Contract 7700021184 • Completed 31 May 2026
No extension recorded

2025-26 **Printer AMC**

Contract 7700021488 • Completion certified 30 Jun 2026
No extension recorded

Proof beyond promises

Repeat award and formal completion certification demonstrate D-TECH's ability to mobilise, operate and close enterprise field services within GNFC's technical, safety and governance framework.

WHY THE MODEL MATTERS

A dependable IT operations layer for the enterprise

D-TECH's FMS model brings multiple support domains under one operating rhythm. The result is clearer accountability, faster coordination and stronger operational control across users and infrastructure.

ONE ACCOUNTABLE PARTNER

A unified service owner across endpoint hardware, software, LAN, fibre, collaboration and printers.

PRODUCTIVITY PROTECTION

On-site diagnosis, replacement readiness and data-aware restoration support business users.

OPERATIONAL VISIBILITY

Online complaint records, asset data and periodic analysis create an auditable service trail.

LOWER SERVICE RISK

Resident support, escalation, alternate coverage, tools and spares reinforce service continuity.

INDUSTRIAL READINESS

Delivery aligned with plant access controls, PPE, safety rules and shutdown/event requirements.

SCALABLE SERVICE BASE

A repeatable model that can absorb asset changes, new LAN requirements and technology refreshes.

D-TECH FMS VALUE PROPOSITION

People. Process. Technology. Accountability.

A proven, multi-site service framework for organisations that need reliable day-to-day IT operations and a partner capable of working inside demanding industrial environments.
