Coverage Designed Around Operational Continuity

 Comprehensive Coverage Repair or replacement of installed parts when a covered system develops a problem.	 Certified Replacement Parts Every replacement part required to be Dell certified.
 Qualified Site Response Visiting personnel required to be competent and knowledgeable for the respective system.	 No-Cost Resolution Diagnosed problems to be repaired or parts replaced without cost implication to Petronet LNG.

COVERAGE PRINCIPLE

A single accountable support partner across a mixed Dell estate - from server platforms to control-room workstations.

From Helpline to Resolution Within 24 Hours

The service order defined an end-to-end response model with continuous helpline access, engineer assignment, diagnosis and closure.

01

LOG

Petronet LNG logs the complaint through the active helpline.

02

ASSIGN

D-TECH assigns an engineer for remote understanding or site visit.

03

DIAGNOSE

The competent engineer identifies the affected system or part.

04

RESOLVE

Repair or certified replacement is completed within 24 hours.

SAFETY BY DESIGN

PPE Compliance

All D-TECH personnel to use adequate PPE in line with Petronet LNG safety norms.

Work Permits

Necessary work permits arranged by the Petronet LNG engineer-in-charge.

Site Coordination

A nominated D-TECH site in-charge for communication and job coordination.

Operating Discipline

Work aligned to Petronet LNG working hours and engineer-in-charge instructions.

CONTRACTUAL SERVICE PROMISE

“After diagnosing the problem, the same shall be resolved within 24 hours either by repair or replacement of part without any cost implication to PLL.”

Industrial Reliability Built on Accountability

The Petronet LNG engagement demonstrates how D-TECH converts an equipment warranty into a managed support framework for a high-discipline industrial site.

13

SYSTEMS COVERED

One documented estate spanning ESVT, OPC, FGS and BAS systems.

24H

MAXIMUM RESOLUTION

A clear contractual target from complaint diagnosis to repair or replacement.

OEM

CERTIFIED PARTS

Replacement components required to be Dell certified.

PPE

SAFETY COMPLIANCE

Site execution aligned with Petronet LNG safety and work-permit requirements.

What This Case Demonstrates

- ✓ **Mixed legacy infrastructure can be managed under one structured support plan.**
- ✓ **Clear helpline ownership and engineer assignment remove ambiguity during faults.**
- ✓ **Repair-or-replace commitments connect technical response with business continuity.**
- ✓ **Industrial IT support must combine technical competence with safety discipline.**
