Safety Training & Work Permit Kiosk

A turnkey digital safety enablement solution

TOUCH • TRAIN • VERIFY • ISSUE

SOLUTION PROFILE

Client: ROCKWOOL

Solution: STK Safety Training + Work Permit

Delivery: D-TECH turnkey implementation

DIGITAL • SECURE • EFFICIENT • RELIABLE

Lead with Trust. Inspire with Vision.

WHY THE PROJECT MATTERED

Moving safety processes from manual to managed

ROCKWOOL required a more structured way to deliver safety learning and manage work-permit activity. Manual records, fragmented approvals and limited visibility made it difficult to deliver a consistent, traceable experience for employees, contractors and supervisors.

The operational challenge

- Manual safety-training processes
- Work-permit approval delays
- Difficult tracking and audit preparation
- Variable access to safety content
- Paper-dependent handoffs and records

D-TECH response

DIGITISE

A touch-enabled kiosk brings safety learning and permit activity into a common digital interface.

STANDARDISE

Defined content, language support and controlled workflows create a repeatable user experience.

TRACE

System activity and reports support monitoring, verification and audit readiness.

VALUE PROPOSITION

One coordinated solution combining kiosk hardware, interactive learning, identity verification, safety-pass issuance, multilingual content and a governed digital work-permit process.

INTEGRATED SAFETY ENABLEMENT

Purpose-built kiosk, software and workflow

The solution was designed as more than a display terminal. It connects the worker-facing experience with training content, supervisor controls, identity verification, pass issuance and management visibility.

**TOUCH INTERFACE**

User-friendly, self-service navigation for individual training and induction.

AUDIO & VIDEO

Rich media delivery supports clearer, more engaging safety communication.

BIOMETRIC VERIFY

Fingerprint-based verification links the user to the completed activity.

SAFETY PASS

Integrated printing enables controlled collection of a safety pass after the process.

GROUP TRAINING

A larger training mode supports team sessions and common safety briefings.

WORK PERMITS

Digital create, review, approve/reject and tracking workflow for permit control.

TURNKEY DELIVERY

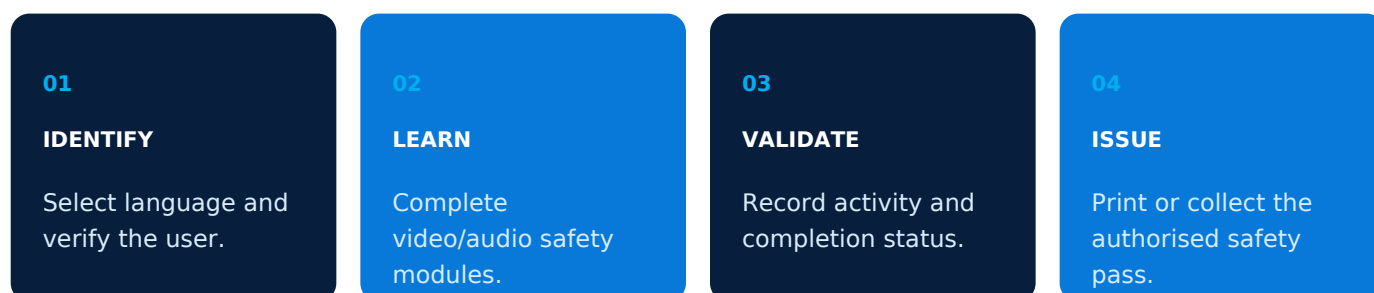

Design • kiosk integration • application setup • content enablement • testing • deployment support

CONTROLLED FROM TRAINING TO PERMIT

A clear, role-based digital journey

The kiosk supports two connected outcomes: verified safety learning for workers and a governed work-permit process for supervisors and safety administrators.

Safety training journey

Work-permit governance

Stage	Primary role	Digital control
1. Permit creation	Supervisor	Enter work type, date, location, duration and safety requirements.
2. Safety review	Safety Manager / Admin	Review required PPE, competency, training, risk and hazard considerations.
3. Decision	Authorised approver	Approve when conditions are satisfied or reject with reasons for correction.
4. System control	System / authorised users	Maintain access control, accountability, permit records and compliance visibility.

Control principle: the digital workflow supports proper authorisation, visibility and consistent decision steps; final permit authority remains with designated ROCKWOOL roles.

CONTENT DESIGNED FOR CRITICAL ACTIVITIES

A broad safety-learning catalogue

The supplied solution video identifies the following safety modules. Content can be presented through the kiosk's touch, audio and video interface and supported across English, Hindi, Gujarati and other Indian regional languages.

TRAINING MODULES

- | | |
|---------------------------|---------------------------------|
| ● Fire safety | ● Chemical safety |
| ● Electrical safety | ● Excavation safety |
| ● PPE training | ● Hot-work safety |
| ● Confined-space safety | ● Work at height |
| ● Driving safety training | ● Material handling |
| ● Lockout Tagout (LOTO) | ● General safety |
| ● Work-permit training | ● Environmental basic awareness |
| ● SHE awareness | ● Safety induction |

Governance enablers

MULTILINGUAL

Improves accessibility for a diverse workforce and contractor base.

REAL-TIME VIEW

Supports activity tracking, reporting and audit preparation.

DESIGN VALUE

One controlled platform helps ROCKWOOL deliver repeatable safety communication across multiple topics, user groups and languages.

A STRONGER DIGITAL SAFETY FOUNDATION

From manual handoffs to a managed ecosystem

The implemented solution provides a practical platform for standardised learning, controlled work-permit decisions and traceable user activity. The value below reflects solution capabilities; no unverified ROI or incident-reduction percentage has been added.

CONSISTENCY

Repeatable safety content and guided workflows across employees and contractors.

TRACEABILITY

Training activity, permit decisions and system records support audit preparation.

ACCESSIBILITY

Touch operation, multimedia delivery and multilingual support widen usability.

CONTROL

Role-based permit review and approval strengthen accountability and governance.

EFFICIENCY

Digital capture and pass issuance reduce manual handoffs and paper dependency.

SCALABILITY

A common kiosk platform supports recurring induction and expanding training needs.

PROJECT OUTCOME

ROCKWOOL moved toward a smarter, automated and more compliant safety ecosystem by connecting workforce learning, identity verification, safety-pass issuance and work-permit governance in one solution.

CUSTOMER APPRECIATION LETTER

APPRECIATION LETTER

Date: 29.05.2026

To,
Mr. Rahul Sharma
D-TECH Solution Integrators Pvt. Ltd.

Subject: Appreciation for Successful Project Completion

Dear Team,

We would like to express our sincere appreciation to **Mr. Rahul Sharma** of **D-TECH Solution Integrators Pvt. Ltd.** for the successful implementation and support provided for the following solutions at **Roxul-Rockwool Insulation India Pvt. Ltd.:**

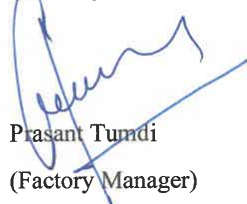

- Safety Training Kiosk
- Group Training Kiosk
- Customized Work Permit Module

Your team demonstrated excellent technical expertise, professionalism, and commitment throughout the project execution. The implementation was completed successfully as per our operational requirements and expectations.

We appreciate the timely support, coordination, and dedication shown by your team during the entire process. We look forward to continuing our professional relationship for future projects as well.

We wish Mr. Rahul Sharma continued success in all future endeavors.

Sincerely,

Prasant Tumdi
(Factory Manager)

OFFICIAL CUSTOMER EVIDENCE

WORK COMPLETION CERTIFICATE

WORK COMPLETION CERTIFICATE

Date: 29.05.2026

This is to certify that **D-TECH Solution Integrators Pvt. Ltd.** has successfully completed the implementation and customization work for the following modules at **Roxul-Rockwool Insulation India Pvt. Ltd.:**

- Safety Training Kiosk
- Group Training Kiosk
- Customized Work Permit Module

The above-mentioned work has been completed successfully as per the required scope and operational requirements.

We appreciate the support and coordination provided during the project execution and look forward to continued business association.
